

KSM MINING ULC

A SUBSIDIARY OF SEABRIDGE GOLD INC.

Seabridge Gold Inc. is seeking an experienced **Health and Safety Field Coordinator (seasonal, field based)** for our KSM Project from April to October 2021. This team member will be responsible for assisting our employees and contractors maintain a healthy and safe work environment. The KSM Project is a proposed gold/copper mine, located 65 kilometres northwest of the town of Stewart, B.C.

Job Responsibilities include:

- Develop, implement, and review health and safety plans, policies, and procedures to reduce the risk of workplace accidents and injuries.
- Monitor and be involved in procurement of the required Personal Protective Equipment to be distributed to employees and contractors to their personnel as prescribed by legislation.
- Provide training and resources to personnel relating to best practices for health and safety.
- Inspect, analyze, and audit on-site safety practices. Offer recommendations and/or take immediate corrective actions.
- Conduct the investigation of health and safety incidents to determine the root cause and implement corrective actions, as necessary.
- Conduct emergency preparedness and other related drills.
- Collect, analyze and manage industrial health, safety and field data.
- Encourage ownership and accountability to employees and contractors to increase health and safety awareness.
- Apply methods to measure and recognize progress in safety stewardship and regulatory compliance.
- Attend toolbox meetings and routinely communicate expectations with a focus on continued improvement for personnel health and safety.
- Regularly review and be familiar with all applicable regulations, acts, codes, legislation, and standards and ensure compliance.
- Review and train employees and contractors implementing task specific operating procedures.

Qualifications and Experience:

- BC CSS/NCSO is the minimum level of qualification.
- Minimum of 3 years in a health and safety role.
- Minimum of 5 years in a mining or heavy industrial environment.
- Considerable experience implementing and supporting safety programs, workplace inspections, audits, and incident investigations.
- Demonstrate experience to interpret and apply relevant regulations and legislation (Mines Act, WorkSafe BC Occupational Health and Safety Regulations and Guidelines)
- Able to engage, challenge, and reinforce leader accountability for health and safety where leader behaviour does not meet expectations.
- Experienced in project and field risk management.
- Experience and training in responding to serious incidents and the investigation of those incidents.
- Demonstrated ability to work in a camp-based environment: 3-week camp rotation, up to 12 hours per day.
- Valid Occupational First Aid.
- Proficient with MS Office software (Word, Excel, Office PowerPoint)
- Valid Canadian Driver Licence.
- Legally entitled to work in Canada.
