RE: 2017 Association of Mineral Exploration Robert R. Hedley Award Congratulations

Dear Rudi, Brent and Elizabeth,

On behalf of the Tahltan Nation Development Corporation (TNDC), congratulations on receiving the 2017 Robert R. Hedley Award from the AME, which honours excellence in social and environmental responsibility for the KSM Project.

We extend special congratulations to Brent and Elizabeth in the recognition of your significant contributions leading Seabridge Gold's sustainable development program for the KSM Project.

The recognition by your colleagues and peers from the mining and exploration industry with this esteemed award speaks to Seabridge Gold's corporate commitment to sustainable and responsible exploration and development and efforts to establish a new industry standard for environmental stewardship and leadership in social engagement.

TNDC admires Seabridge Gold's efforts to pioneer community engagement, local development and environmental initiatives, extending well beyond the requirements of the environmental assessment process while protecting the economic feasibility of the project. We realize the award recognizes the company's emphasis on local community input into the development of KSM's overall design. TNDC appreciates your efforts to support the community through employment, training and contracting opportunities.

We look forward to offering our congratulations in person during the Roundup conference in January, and to continuing to support Seabridge's exploration and development programs in 2018.

Sincerely,

Peter Arendt, P.Eng.
Chief Executive Officer
