

Fluor is one of Canada's top employers and is recognized globally as a leader in the Engineering, Procurement, Construction, Fabrication, and Maintenance industry. Our focus on innovation and providing cost-effective technology-based solutions is second to none. As we look to the future, we need creative, ambitious, and innovative professionals who can help us fulfill our purpose to Build a Better World.

Fluor team members are at the heart of our success in executing projects safely, thoughtfully, and with the highest quality. We aim to foster an inclusive culture that prioritizes diversity and inclusion that allows employees to bring their best, most authentic selves to work. If you value teamwork, empowerment in your career, and are eager to champion innovative and sustainable solutions to our clients, this opportunity just may be for you!

The Senior Environmental Superintendent is responsible for assisting our employees and contractors to advance the KSM Project. This would include managing two Environmental Superintendents, advising construction crews of Federal and Provincial permits and compliance requirements, construction environmental best management practices and ensure an overall responsible environmental practice. A willingness to research and learn a diverse field of scientific knowledge is required.

Key Responsibilities

Key responsibilities for this position may include but are not limited to:

- Working two (2) weeks on and two (2) weeks off, provide KSM environment culture and oversight in the field.
- Respond to requests from the construction crews related to items on how to proceed, including how to guide, respond, and support daily construction activities.
- Verify and ensure compliance to Federal and Provincial permit conditions and appropriate legislation in coordination with Compliance Manager.
- Interface with construction, including review of construction plans and implementation of construction plans.
- Implementation of management plans in coordination with the Environment Manager.
- Weekly reports for the KPIs and internal reporting requirements.
- Follow up of compliance events.
- Draft external reports.
- Supervise Environmental Superintendents, environmental coordinators and environmental monitors.
- Ensure safety and coordination of multiple environmental crews, including completion of environmental program objectives.

Education, Skills and Experience

- Ten (10) to fifteen (15) years of environmental permitting and compliance experience related to mining, forestry, or energy projects in British Columbia
- Experience in sediment and erosion control best management practices
- Experience in construction activities and oversight of environmental practices
- Bachelor's degree in science or related discipline
- R.P.Bio, P.Biol., P.Eng., or equivalent registration with a professional regulatory body

Strong interpersonal, management and leadership skills required. Flexible team player, willing and able to work on a wide variety of tasks.

Are you ready to join us? We are looking forward to hearing from you today!

Location

Based at the KSM Project, two (2) weeks on and two (2) weeks off rotation.

Closing Date: November 30th, 2022

While only qualified candidates will be contacted for an interview, be sure to continually check our website for other related positions as they are posted.
