

SEABRIDGE GOLD

Seabridge Gold is a Canadian-based mineral exploration company.

It owns several exploration projects in Canada and the United States.

Seabridge Gold has a strong commitment to the community, environment and safety.

Our Projects

1 KSM MINING ULC

A SUBSIDIARY OF SEABRIDGE GOLD INC.

British Columbia, Canada

The KSM Project is a proposed gold, copper, silver and molybdenum mine, located 65 km northwest of the town of Stewart, B.C. In 2014, the KSM Project received Environmental Assessment (EA) approval under the British Columbia EA Act, the Canadian EA Act (1992) and the Nisga'a Final Agreement. In 2020, Seabridge purchased the neighboring Snowfield Property (now called East Mitchell deposit) which could have a significant positive impact on the KSM Project economics.

Seabridge has entered into Impact Benefits Agreements with the Nisga'a Nation, Tahltan Nation, and signed a Gitanyow Wilp Sustainability Agreement. Seabridge also received letters of support from the Gitxsan Hereditary Chief's office for the KSM Project.

2 SNIPGOLD

A SUBSIDIARY OF SEABRIDGE GOLD INC.

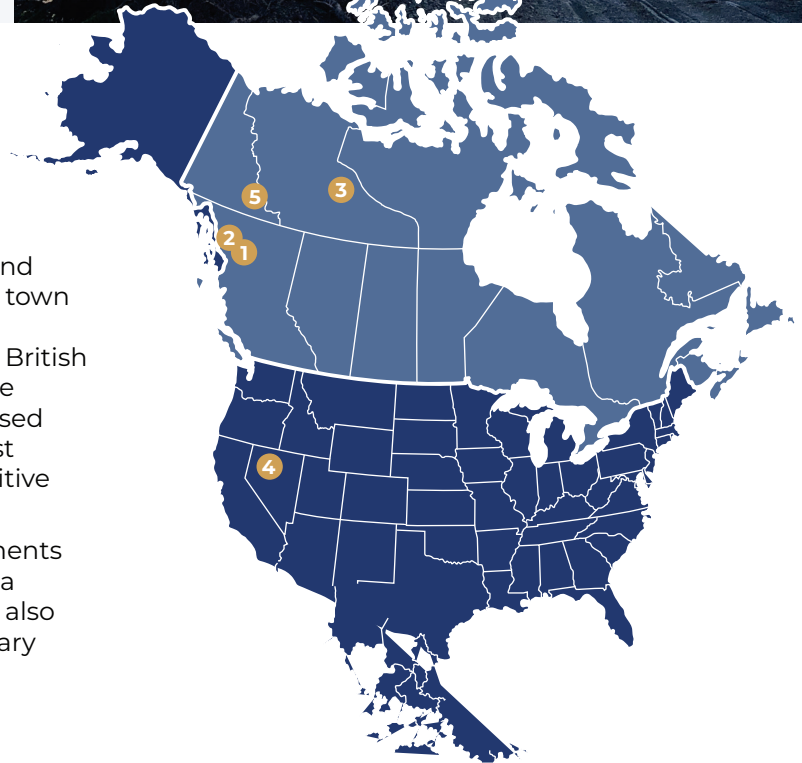

British Columbia, Canada

The Iskut Project was obtained upon Seabridge's acquisition of SnipGold Corp. in June 2016. The Project includes the former gold Johnny Mountain Mine and Bronson Slope deposit, located 110 km northwest of Stewart, B.C. Detailed environmental remediation is being done on site and exploration drilling started in 2017.

3 COURAGEOUS LAKE

Northwest Territories, Canada

The Courageous Lake Project is located 240 km northeast of Yellowknife. The Project covers almost all of the 53 km long Matthews Lake Greenstone Belt, which historically hosted two high-grade gold mines and has gold showings all along its length. Seabridge plans to grow the estimated resource base with additional drill programs to identify higher grade zones and new deposits.

4 SNOWSTORM EXPLORATION LLC

A SUBSIDIARY OF SEABRIDGE GOLD INC.

Nevada, United States

The Snowstorm Project consists of 31 square miles of land holdings strategically located at the projected intersection of three of the most important gold trends in Northern Nevada: the Carlin Trend, the Getchell Trend and the Northern Nevada Rift Zone.

In August 2019, Seabridge acquired the neighbouring Goldstorm Project consisting of 134 mining claims and 1,160 leased acres (totalling approximately 3,900 acres or 15.9 km²) located about 3 km to the east of the Snowstorm Property.

5 3 ACES

A SUBSIDIARY OF SEABRIDGE GOLD INC.

Yukon, Canada

The 3 Aces Gold Project was acquired by Seabridge in May 2020 from Golden Predator Mining Corp. Located in the southeast of Yukon, Canada, the Project covers approximately 350 square kilometres on the eastern margin of the Selwyn Basin, which hosts several larger base metal deposits, including Howard's Pass. Exploration drilling began at 3 Aces in 2021.

At Seabridge Gold, being a responsible and welcome member of the communities in which we operate is an essential part of our business strategy.

Community

Seabridge is dedicated to establishing strong relationships with the communities surrounding our projects. We believe it is important that Indigenous and non-Indigenous people living in the project area are engaged and have their voices heard.

For example, since acquiring the KSM Project, Seabridge has attended several community workshops and meetings, conducted site tours and hosted public forums in the local communities.

Since 2009, Seabridge has annually supported fitness, training, community and well-being programs. As well, Seabridge established programs and sponsored students from local communities in their educational pursuits.

Environment

We recognize that mining can affect the environment. Our Sustainability and Stakeholder Engagement Policy and environmental standards are designed to protect the environment and prevent - or otherwise minimize, mitigate and remediate - impacts.

Partnerships with experts, regulators and communities also help inform our management systems to ensure they are implemented consistently and are effective at protecting our environment.

Safety

Seabridge Gold's priority is the safety and well-being of the surrounding community, partners and employees; this means caring for the communities around us by ensuring proactive health and safety regulations, enhancing personal and community well-being, encouraging diversity and open communication.
